informed consent to chiropractic care

Changes in the law now require all practitioners who adjust the spine to warn clients of material risks. Chiropractic care is recognised as being an effective and safe method of care for many conditions. However, you must recognise that there are risks associated with all health care procedures including assessment and treatment, which you should be informed about.

In extremely rare circumstances, chiropractic care of the neck may damage blood vessels and give rise to stroke or stroke-like symptoms (current statistics less than 1 in 2 million to 1 in 5.85 million-Haldeman, et al. Spine vol 24-8 1999). Other very slight risks including strain/injury to a ligament or disc in the neck (less than 1 in 139,000) or the low back (1 in 62,000-Dvorak study in Principles Practice of Chiropractic, Haldeman. 2nd Ed.). For some clients with bone weakening diseases, a fracture of a bone although rare is possible.

Chiropractic adjustments of the spine are internationally recognised as being far safer in dealing with neck and low back pain than medication and many other alternatives (A Risk Assessment of Cervical Manipulation, JMPT, 1994. Manga Report, Ontario Ministry of Health, 1993).

I have been given the opportunity to discuss the proposed care and the above information with the Chiropractor and ask questions and give my consent to chiropractic care. I hereby acknowledge my consent to the performance of the proposed chiropractic care by any chiropractor working in this clinic. I understand I can withdraw consent at any time.

I acknowledge that I am aware of and understand the potential risks which include but are not limited to muscle and joint soreness or strains, nausea and dizziness, fracture, disc injuries including disc encroachments/ruptures causing nerve irritation and referred symptoms, strokes or like episodes and exacerbation and/or aggravation of my underlying condition. Such risks may result in outcomes such as referral, further tests, surgery, incapacity and the like. I appreciate that results are not guaranteed. I do not expect the practitioner to be able to anticipate all potential risks and complications associated with the proposed care.

Consent for use and disclosure of personal health information

We collect information (which may include photographs/video) from you so we can assess, diagnose and manage your health properly and be proactive in your care. We use the information in the following ways:

Administration purposes and billing in compliance with Health Insurance, Medicare and DVA as and if required. Disclosure to others involved in your health care, including Doctors/Allied Health Professionals outside this practice whom may be involved in treating you. Disclosure to other Doctors in the practice, locums and students etc. attached to the practice for the purpose of client care and teaching. For research and quality assurance activities (this does not identify you in any way) to improve individual, community health care and practice management. Disclosure to others for medical defence or legal purposes, if necessary.

I have read the above and understand why information collection is necessary. I am aware that is Practice has a privacy policy on handing client information.
